

## **Manage Your Therapy. Master Your Margin.**

### **Accurately track and document the therapy services that are vital to your facility's reimbursement.**

Managing your therapy services has never been easier - or more rewarding! American HealthTech's Ancillary Tracking module accurately captures and documents the rehab RUG levels that drive your reimbursement. The module integrates fully with the Assessment Reference Date (ARD) Optimizer in our Clinical module to suggest the best ARD within the MDS window. Using the best ARD ensures you don't miss valuable reimbursement opportunities.

#### **Save Thousands!**

If you miss a rehab RUG level because you used a poor Assessment Reference Date, the cost could be \$50.00 per day or more.\* For the average SNF with 10 Medicare admissions per month and an average length of stay of 23 days, this could translate to as much as \$138,000 a year! This solution easily pays for itself and the continuing impact on your bottom line can be tremendous!

\* Calculation based on Oct. 2004 urban rates assuming an average of \$50.00 difference between rehab RUG levels RLB-RMB, RMB-RHB, RHB-RVB and RVB-RUB.

#### **Accurate Documentation**

While you're optimizing your reimbursement, you'll also be improving your documentation. This solution provides thorough electronic documentation of the entire therapy process. It closes the critical gaps between therapies provided, therapies recorded in the MDS, and therapies billed. Resident information is always consistent and accurate.

#### **Improve Cash Flow**

Your therapy log transfers to billing without re-keying a single stroke. The system automatically converts therapy time to billing units for the claims. The result is accurate, timely billing and improved cash flow.

#### **Electronic Health Record**

As another integral component of American HealthTech's electronic health record design, this module retains an electronic format – complete with electronic signatures – of all resident therapy plans and progress notes.

#### **Manage Therapy Staff**

Track therapist productivity and non-billable time. You can better determine staffing needs by analyzing your facility's entire therapy dispensing process. Best of all, you can reap all these benefits whether you use in-house therapists or a third-party provider.

### **Reports That Let You Manage Even More Effectively**

To spot trends and plan staff resources, the system supplies numerous reports that help you effectively manage your therapy services. The Monthly Service Log provides details for billing, while the Goal-to-Minutes Variance Report lets you monitor each therapist's progress by resident. Plus, there's a rolling 7-day Therapy Recap report that serves as back up to your MDS answers and much, much more!

### **Works Within Your Budget**

This therapy management solution is designed to operate on a wide range of input devices that fit every budget. Our technology experts help you select what's best for your facility. Choose from wall-mounted touch screens, cart-mounted laptops, and traditional "wired" work stations.

### **Track Supplies, Too!**

In addition to the full Therapy Management functionality, Ancillary Tracking allows you to track your facility's supplies and helps you gain better control over your inventory, your usage, and your bottom line.

### **Contact Us Today!**

The sooner you gain control over your therapy services, the sooner your facility can reap the benefits! **Contact us or call 1-800-489-2648, ext 1051 today, and let us show you how we can help.**
