

## Set a whole new standard of quality with Smart Charting

Smart Charting is our automated charting module that has been built from the ground up to integrate fully with our clinical and financial software package.

Smart Charting's abundant features can dramatically improve the performance of your facility - both clinically and financially.

- **Improve Your Quality of Care**
- **Maximize Your Staff**
- **Optimize Your Reimbursement**
- **Address Regulatory and Litigation Issues**
- **Tailor to Your Needs**
- **Work within Your Budget**

Smart Charting is an integral part of American HealthTech's fully integrated clinical solution set. It is also a part of our complete development roadmap for electronic health records interoperability throughout the continuum of care.

Call to see the full roadmap and to get a demonstration of American HealthTech's Smart Charting solution!

### Smart Charting Highlights

With Smart Charting, your staff can work more efficiently and more effectively than ever before!

#### Effective Workflow

- Our daily "eCare Guide" collects resident-specific data electronically
- Direct integration with care plan approaches with no re-keying
- Track tasks that are late, current, and not specifically timed

#### MDS & Other Assessments

- Assessment fields are updated with each resident encounter - no syncing required!
- Automatically collects MDS data for "look back period" maximization

#### Supervision and System Management

- Nursing Command Center enables your staff to monitor care tasks, spot irregularities and take immediate action
- Resident information is always readily accessible - including the current care plan

### **General Features**

- Fully integrated with our entire suite of clinical and financial software
- Real-time wireless input means resident records are always current
- Provides two-way coaching and feedback at the point of care – instantly!
- Logically follows the course of familiar paperwork but in a faster and more efficient electronic format
- Intuitive design takes the user step-by-step through every input screen
- A variety of input devices to fit every job function – and every budget

### **Ease of Implementation**

We know that implementing any new system can be a challenge for your facility and staff. You can have quick benefits utilizing our rapid start implementation for core ADL capture. Then, you can tap into our 30-years of experience to develop a unique long-range plan that will guide you through well-planned, progressive phases with the least disruption. You'll move forward at a pace that suits your facility.
