

## nTrust Program

Wish you had the finances for a new, robust EHR?  
Now you do.

Introducing the nTrust Program. It's the no-down-payment, low-risk way to bring a fully integrated EHR to your community hospital or skilled nursing organization.

### THE IDEAL SOLUTION

#### Our innovative nTrust Program:

- > Doesn't require any up-front payments
- > Allows you to finance the purchase of your new EHR with a percentage of collections
- > Makes it easy to move to a market leading EHR — [Thrive](#) for community hospitals or [American Healthtech](#) for skilled nursing facilities
- > Can help you improve the financial health of your organization by reducing AR and increasing cash flow
- > Minimizes financial strain and disruption on your organization

With the nTrust Program, you can move to the leading EHR for no up-front costs, no ongoing fees, and with the support of a partner that is invested in long-term success of your organization and your community.

With nTrust, we are not just partnering with you to help you succeed; we are investing in your success for the long term. We have a stake in your success: if you don't get paid, we don't get paid. Our ability to collect payment for our products and services is directly tied to the overall success of your organization.

nTrust allows you to focus on what matters most to your organization: managing the health of your patients, residents, and the overall community you serve.

## TAKE A CLOSER LOOK

Learn more about nTrust and how it has been designed with your best interests in mind:

### A new way to finance

nTrust can be constructed to finance not only the purchase of a core EHR but also add-on products, additional services (including those offered by [TruBridge](#) such as consulting and managed IT services), ongoing maintenance costs and any other costs associated with the EHR.

### Flexibility you need

nTrust offers you flexibility — should you decide to change the way you manage your collections operations down the road, you won't have to replace your EHR.

### Minimize risk

Since nTrust is based upon a percentage of collections, your risk/exposure is reduced (you effectively pay less should you face financial challenges).

### A different approach to collections

We take a personal approach to collections — our collection programs are customized to your particular needs and managed by regional teams whose performance is based solely on the service they provide.

## It's a win-win.

With nTrust, you'll gain the tools you need to enhance profitability and benefit from an EHR built to help you address the specific challenges your organization faces.
