

Cloud Services

Benefits

- 99.9% uptime
- Live support 24/7
- Anywhere, anytime access
- Easily scalable
- Predictable, monthly operating expenditure

TAKING YOUR IT RESOURCES FURTHER

When it comes to IT infrastructure, many healthcare organizations face a tremendous challenge. Demands are increasing due to the proliferation of clinical and administrative applications, regulations like HITECH and intensive use of IT assets associated with heavy data traffic. At the same time, the physical, financial and staffing resources needed to grow the data center in order to accommodate these demands may not be available.

TruBridge offers a high-performance, cost effective alternative to data center growth. Our enterprise class cloud computing infrastructure can support your most sensitive mission-critical workloads while relieving you of the need to invest in – and manage – new server infrastructure. We've built our cloud to be highly scalable, available, robust and secure; we rely on these same systems to run our own enterprise.

With TruBridge Cloud Services, you can go far beyond the boundaries of your own infrastructure, growing in response to business demands without getting held back by procurement delays or new equipment and maintenance costs. We assume all responsibility for upgrading the IT infrastructure as necessary to ensure that your service level agreements are adhered to. Rest easy knowing your data is regularly backed up and constantly monitored by CCTV plus onsite guards in a world-class data center meeting SSAE16. In an environment where it can be difficult to maintain adequate capacity to meet rising needs, TruBridge offers you peace of mind that your infrastructure will be up to par at all times.

ABOUT TRUBRIDGE

TruBridge is in the business of helping hospitals of all sizes get paid faster and get paid more through a combination of people, products and process optimization. From our HFMA Peer Reviewed® product to complete business office outsourcing, TruBridge helps organizations become more efficient at serving their communities.
