

## Long-term solutions that lead to your LTC success

American HealthTech helps skilled nursing facilities like yours to navigate the ever-changing regulatory environment and get a handle on your bottom line today, while supporting your long-term growth for tomorrow.

Our comprehensive, integrated EHR solutions deliver a seamless flow of information between the resident care, coding and billing, and financial management functions.

That's what you can expect from a leading provider for LTC with 30+ years of industry insight. Even better, it's 100% backed by dedicated support and service.

*Get the right solution for your facility*

## Financial and Enterprise Management

**Gain peace of mind and profitability along with a healthy bottom line for your business**

Changes in payment models make it imperative that your organization establishes a firm financial foundation. American HealthTech Financial and Enterprise Management is integrated with the AHT Revenue Cycle Management (RCM) and AHT Clinical Management suites, and designed specifically for skilled nursing organizations. This comprehensive technology will help you manage your facilities, glean cost-saving insights, and make smart financial decisions.

### The Big Picture

Set up your business for success with this comprehensive set of financial solutions that enables better controls to improve cash and costs. Used in conjunction with RCM, our Financial and Enterprise Management is trusted by more than 3,000 facilities across the country. It successfully:

- **Arms you with an affordable, industry-specific solution** that works out of the box on day one
- **Integrates with the entire AHT solution**, eliminating double-entry and providing easy access to account details, powerful benchmarking and reporting, and automated capture of clinical care for billing
- **Supplies you with rich information** so you can better manage the top and bottom line, as well as make more informed, data-driven business decisions.

## Take a closer look

No matter how large or small your organization is, the AHT Financial and Enterprise Management solution is ready to go with minimal setup. It features a number of significant applications.

### Accounts Payable

This smart solution lets you slice and dice how you pay invoices (by date, vendor, partial payments, etc.), generate purchase orders that are integrated with inventory management, create 1099s, and allocate expenses to multiple facilities. Run the unique Month To Date Payables Analysis any time to check current spending patterns against budget. Recurring Accounts Payable reduces data entry and risk of missed payments.

### General Ledger

You'll have ultimate flexibility when formatting financial statements, including mini statements (by department, for example). Multiple operating budget formats allow for a variety of "what if" analysis and are exceptional management tools. When special investigations are needed, you can quickly drill down into accounts.

### Payroll

Boost efficiency with this solution that integrates directly into your General Ledger. Eliminate the need for expensive monthly payroll services and enjoy automatic time clock import, auto-pay, multi-account deposits, and turnover analysis. You'll also be able to monitor performance against staffing budget every pay period to evaluate this crucial area of controllable costs.

### Financial Management

Developed to address the specific needs of skilled nursing organizations, this solution provides the tools you need to run smoothly, including:

- Daily Cash Management: Synchronizes all cash-related transactions to give an up-to-the-minute cash balance
- Cash Deposits: Automatically transfers from Billing to Bank Reconciliation, which reduces data entry and depicts an accurate cash flow projection

### Trust Funds

Manage all aspects of your residents' trust funds separately from the general resident billing function. Users can monitor balances, interest accrued on each account, and patient statements.

### Enterprise Management

With Enterprise Management, you'll come to rely on current data to make clean decisions as you run your business in real time. Benefits include:

- Different levels of account visibility so you can accurately monitor organizational performance and make changes
- Ability to centralize facility bank accounts to corporate office books through intra-company accounts
- Benchmarking of key metrics that let you make comparative assessments in areas like labor costs, census, financials incidents, infections, and PPD costs across all facilities

#### Compliance Center

Keep your staff fully up to date with enhanced real-time communication throughout the entire organization. You can easily notify everyone about newly admitted residents, regulatory items, the latest policies, changes with prioritization, and any other changes within your facility.

#### Corporate Office

Run your multiple facility organization with ease while benefiting from excellent proactive management tools, such as Cash Receipts Journal, Resident Days, Aged Analysis, and Receivable Analysis. Consolidated financial statements can be run for any combination of facilities, such as state or regional breakdowns. Additionally, multiple comparative reports are at your fingertips.
